Summary

Product Manager with an engineering foundation, MBA from IIM Bangalore, and hands-on experience across AI-enabled workflows, customer-facing platforms, data systems, security products, and 0-to-1 prototypes. Comfortable moving between customer discovery, PRDs, prioritization, evaluation metrics, stakeholder alignment, and technical execution.

Work Experience

Amazon | Product Manager

Jun 2026 - Present

- * Working on AI-enabled internal products with a focus on discovery, requirements, prioritization, evaluation quality, stakeholder alignment, and measurable operational leverage.
- * Define product requirements, success metrics, feedback loops, and adoption paths for technical workflows used by cross-functional business and engineering stakeholders.
- * Partner with engineering and business teams to translate ambiguous operational needs into scalable product decisions while maintaining responsible AI guardrails and delivery discipline.

Amazon | AFBP MBA Intern | Pre-Placement Offer

Apr 2025 - May 2025

- * Reframed a customer-backed operations problem using field research, process maps, stakeholder feedback, and operational data.
- * Converted findings into product requirements for earlier detection, prevention, and improved routing decisions, with a focus on reusable process improvements.

Lookout India Technologies | Software Engineer

Sep 2020 - May 2024

- * Partnered with Product Managers to identify 15+ product improvements and deliver 35+ customer-facing features and 15K+ lines of code, increasing adoption by 10% and performance by 25%.
- * Designed an encryption framework for 100M+ PII records, enabling privacy controls adopted by 8+ enterprise clients.
- * Led Vertica migration and redesigned the SIEM framework across 14+ activity types, improving process efficiency by 70%, cutting query time by 80%, and reducing latency by 55%.
- * \$100K+ enterprise client onboarding through PAN proxy capabilities and resolved 30+ critical production issues, protecting continuity for 25+ customers.
- * Developed dynamic risk scoring across 35K+ cloud environments, improving privacy, compliance, and security visibility by 60%.
- * Coordinated release execution across 3 teams and 50+ members, automated product testing to save 150+ hours, and authored 25+ SOPs that cut resolution time by 25%.

Public Projects

- * Vyapaar Mitra - Designed a fintech concept to help MSMEs access working capital using alternate data signals and simplified credit assessment.
- * AI Customer Support Chatbot - Prototyped a customizable AI chatbot to help SMBs answer customer queries with low-cost support automation.
- * AI Voice Support Agent - Built a real-time Gemini Live prototype with prompt-led intents, Web Audio, and human escalation.
- * AI-Assisted Review Platform - Defined and built a QR-led restaurant review assistant that turns ratings and selected topics into editable, privacy-safe review drafts.
- * WhatsApp Mood Tracker - Built a low-friction behavior tracking flow to help users log moods and identify emotional patterns.

Skills

Product: Product strategy, discovery, customer research, roadmaps, PRDs, prioritization, MVPs, GTM, experimentation, KPIs, product marketing, feature delivery.

AI and Data: Generative AI, LLM products, agentic workflows, prompt engineering, human-in-the-loop design, model evaluation, guardrails, Excel, SQL.

Design and Stakeholders: UI/UX prototyping, Figma, Balsamiq, stakeholder management, client management, process improvement, Six Sigma, Agile, SDLC.

Technical: Java, TypeScript, React, REST APIs, shell scripting, Redis, Spring Boot, Docker, AWS microservices, Kafka, JUnit, Git, Splunk.

Education

Indian Institute of Management Bangalore | MBA

2024 - 2026

National Institute of Technology Warangal | Bachelor of Technology

2016 - 2020

Awards and Achievements

- * Okta Product Management Case Competition: Won a Pre-Placement Interview after reaching the final round with a product solution.
- * Amazon Pre-Placement Offer: Received a full-time offer based on internship performance and impact.
- * Lookout Innovation Winner: Won the intra-company hackathon; the proposed solution was implemented as a product feature.
- * Kotak National Finalist: Ranked 1st among 700+ teams and led strategy for an INR 140 crore wealth-management case.
- * Employee Excellence: Named Employee of the Quarter in a 500+ employee cohort for project delivery and data accessibility improvements.

Positions of Responsibility

- * Tech Head, Summer Placement Facilitation: Led coordination and execution for the junior-batch placement process, ensuring structured delivery and stakeholder alignment.
- * Senior Coordinator, Entrepreneurship and Innovation Cell: Partnered with the campus incubator to deliver entrepreneurship initiatives and institute-wide innovation activities.
